

RADIO-CONTROLLED PENDANTS

FOR EASE OF USE AND VERSATILITY

Spanco offers a selection of radio-controlled pendant kits which allow the operation of a jib, gantry, or workstation crane from a safe distance with great accuracy and without the hindrance of cables or the obstruction of the view. Choose from single or double transmitter options with your choice of primary or rechargeable batteries.

FEATURES & BENEFITS

- Enhanced Safety Features**
 Transmitters continuously send **stay alive** pulses to the receiver. If the corresponding receiver loses sight of the transmitter, the receiver safety relay(s) drop and cut power to the crane's mainline.
- Interference-Free Operation**
 System operates in the 2.4GHz frequency using 802.15.4 communication with direct sequence spread spectrum (DSSS). This allows for interference-free operation of hundreds of systems, in the same area, at the same time, without setting specific channels or keeping complicated frequency logs.
- Extensive Customization Options**
 Some options are field programmable, while others require custom programming or software configuration. Notable possibilities include creating safety zones that disable crane operation when a danger zone is breached, controlling multiple cranes or hoists using a single transmitter, and implementing access control through PIN codes or keys.

500-010-263-37 includes 1 x transmitter and 1 x receiver with pre-wired pigtail cable.

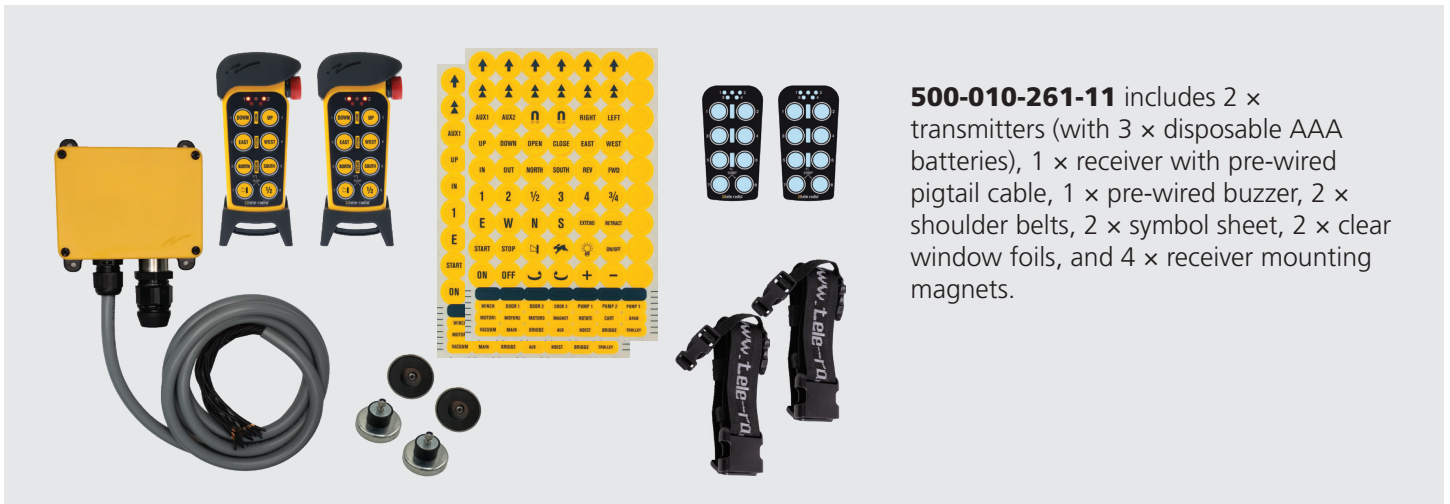

500-010-260-98 includes 1 x transmitter (with 3 x disposable AAA batteries), 1 x receiver with pre-wired pigtail cable, 1 x pre-wired buzzer, 1 x shoulder belt, 1 x symbol sheet, 1 x clear window foil, and 4 x receiver mounting magnets.

RADIO-CONTROLLED PENDANTS

500-010-262-24 includes 1 × transmitter with Li-Ion battery, 1 × receiver with pre-wired pigtail cable, 1 × pre-wired buzzer, 1 × battery charging station, 1 × multi power supply, 1 × spare Li-Ion battery, 1 × shoulder belt, 1 × symbol sheet, 1 × clear window foil, and 4 × receiver mounting magnets.

500-010-261-11 includes 2 × transmitters (with 3 × disposable AAA batteries), 1 × receiver with pre-wired pigtail cable, 1 × pre-wired buzzer, 2 × shoulder belts, 2 × symbol sheet, 2 × clear window foils, and 4 × receiver mounting magnets.

500-010-254-58 includes 2 × transmitters, each with Li-Ion battery, 1 × receiver with pre-wired pigtail cable, 1 × pre-wired buzzer, 1 × battery charging station, 1 × multi power supply, 2 × shoulder belts, 2 × symbol sheets, 2 × clear window foil, and 4 × receiver mounting magnets.
