

# ENCLOSED CONDUCTOR BAR SYSTEM

## CONSTRUCTED FOR IMPROVED SAFETY & EASY INSTALLATION

**Spanco** offers enclosed conductor bars for use with manual and motorized workstations, delivering an ergonomic electrical collecting system. The lightweight, compact design is ideal for installation in tight, hard to reach areas. This easy to maintain system includes a standard double collector for use with variable frequency drives.

### FEATURES & BENEFITS

- Enclosed design of touch-safe housing increases operational safety while protecting the system from environmental implications.
- Modular components provide smooth and easy installation and decreased maintenance, reducing overall system costs.
- Lower collector friction provides smoother movement of enclosed track workstations.
- Maintenance and drop-out sections are available for quick and easy collector removal.
- System can be readily retrofitted to existing Spanco workstation cranes.
