

FESTOONLESS CRANE SYSTEMS

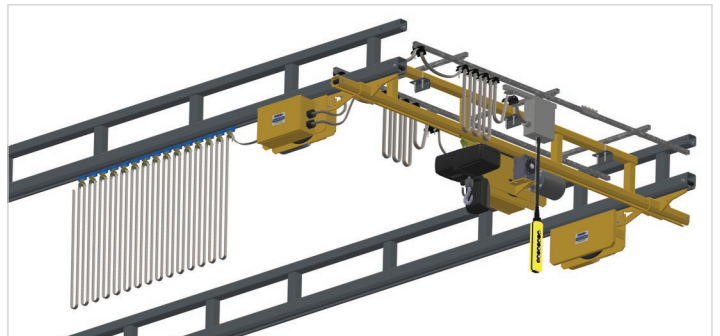

FOR MODERNIZED PERFORMANCE, AESTHETICS, AND DIAGNOSTICS

Spanco offers a contemporary solution for your motorized crane system with our festoonless crane options. Featuring enclosed conductors, wireless motor control, and radio-controlled hoists, these fully integrated systems are available for motorized gantries, jibs, and workstation cranes.

FEATURES & BENEFITS

- **Less Time in the Field**
Preengineered and integrated components reduce installation time and complexity.
- **Cost-Effective**
Streamlined design and reduced labor translate to lower total project costs.
- **Smooth, Quiet Travel**
Enclosed conductor systems ensure consistent power delivery and smooth motion.
- **No Hanging Cables**
No overhead obstructions for a safer, cleaner workspace.
- **Maximized hoist coverage**
Eliminating festoon stackup increases hook approach and trolley travel area.

Top Left: Spanco 201 festooned motorized Jib with electric hoist and wired pendant. Inset shows close-up of festooned cables.

Top Right: Motorized jib with enclosed conductor bar, Workmate™ electric chain hoist, radio-controlled wireless pendant and dual receivers.

Middle Right: Spanco motorized workstation with festooned cables and wired pendant.

Bottom Right: Motorized workstation crane with festoonless option featuring radio-control, enclosed conductor bars, and Workmate electric chain hoist.
